

OUR BENEFITS THAT DRIVE YOUR SUCCESS

WWW.INTERBAU-BLINK.DE/EN

Produced on-site in Germany.

In our responsibility to the environment and future generations, we place great importance on **sustainable, resource-efficient production** and the careful use of raw materials and energy. We manufacture in the heart of Germany at our two production facilities in Ransbach-Baumbach, Westerwald.

Product benefits from regional, high-quality raw materials.

Our tiles contain over 70% clay. The high-quality standard of our products, achieved through the use of **locally sourced clay** (extracted within 15 km of our headquarters), allows for excellent workability—for example, making the tiles easy to cut.

Our company philosophy is guided by sustainability.

We manufacture according to the highest standards, maintain a closed-loop raw material cycle, and implement **energy management in compliance with ISO 50001**. Our electrically powered milling technology, supplied by newly installed photovoltaic systems, enables additional energy savings.

High commitment to our social responsibility.

Interbau-Blink has been owned by the Uta Korzilius-Kern Foundation since 1989, which supports the Children's Cancer Aid Mainz e.V. (Kinderkrebshilfe Mainz e.V.) through an annual donation. The foundation's purpose is to preserve 250 jobs and ensure the **long-term continuity of the company**.

Discover the additional benefits of Interbau-Blink:

- Long-term **price stability** of product ranges for reliable offer calculation.
- Opportunities to influence production thanks to in-house manufacturing.
- **Ensured availability** of all product ranges and long-term distribution of series within the portfolio.
